ABOUT JAYAWANT SHIKSHAN PRASARAK MANDAL

Jayawant Shikshan Prasarak Mandal was established in the year 1998 with an objective of creating centre of excellence for education in the field of engineering, Pharmacy, Information technology and Management. JSPM caters various institutes providing full fledged education from KG to PG, diploma, graduation and post-graduation course in various disciplines spreaded at Tathawade, Hadapsar, Wagholi, Narhe & Bavdhan campuses.

The trust was established by Hon. Dr. Prof. T. J. Sawant, who is an academician, agriculturist and an entrepreneur. The trust's mission is "To provide, nurture & maintain an achievement of high academic excellence, research & entrepreneurship for all aspiring students, which will prepare them to face global challenges".

ABOUT RAJARSHI SHAHU COLLEGE OF PHARMACY & RESEARCH

Rajarshi Shahu College of Pharmacy & Research was established in the academic year 2006-07. The college is situated in lush green campus of JSPM at Tathawade, Pune. The institute is recognized by Govt. of Maharashtra & Affiliated to Savitribai Phule Pune University, Pune; NAAC accredited with "A" grade in 2017; The college started its progressive path under the University approved Principal Dr. K. R. Khandelwal, who is in Pharmacy profession since 1983. The college has got all necessary approvals from AICTE New Delhi, PCI, and affiliated to University of Pune. Investment in human potential has helped college to create skilled and devoted team. The college has well experienced and dedicated staff members with staff student's ratio 1:15. Sincere efforts of the faculty members have created history in the academics of University of Pune by showing excellence in the University exams. Innovative nature of college has made itself as a mark for quality and disciplined education. We have two PG programs in Pharmaceutics & Quality Assurance Techniques. Areas of research include novel drug delivery systems and analytical method developments. validation.

ABOUT THE WORKSHOP

Intellectual property is a broad categorical description for the set of intangible assets owned and legally protected by a company or individual from outside use or implementation without consent. An intangible asset is a non-physical asset that a company or person owns. The concept of intellectual property relates to the fact that certain products of human intellect should be afforded the same protective rights that apply to physical property, which are called tangible assets. Most developed economies have legal measures in place to protect both forms of property. Companies are diligent when it comes to identifying and protecting intellectual property because it holds such high value in today's increasingly knowledge-based economy. Also, producing value intellectual property requires heavy investments in brain-power and time of skilled labor. This translates into heavy investments by organizations and individuals that should not be accessed with no rights by others. Eminent resource person from IPR field will address the delegates

ABOUT THE WORKSHOP

Soft skills and entrepreneurship skills are closely related and often intersect in the world of business. Successful entrepreneurs not only require technical knowledge and expertise but also a strong set of soft skills that enable them to navigate challenges, build relationships, and drive their ventures forward. Soft skills are mainly dealing with Communication: Effective communication skills are vital for conveying ideas, Problem Solving: The ability to analyze complex situations, identify challenges, Critical Thinking: Being able to evaluate information objectively, consider multiple perspectives, Adaptability: skill to adapt to new situations, technologies, and trends are more likely to thrive. Time Management: Balancing tasks, setting priorities, and managing time efficiently Leadership: leadership skills helps influence others positively, drive initiatives, and inspire a sense of purpose., Entrepreneurship Skills includes: Creativity and Innovation: Entrepreneurs often need to think outside the box Business Planning: Creating a solid business plan that outlines your goals, target market, competition analysis, Market Research: Understanding your target audience's needs, preferences, and behavior Sales and Marketing: Entrepreneurship involves promoting your products or services, so skills in sales techniques, branding, digital marketing, and customer engagement are essential. Financial Management: Knowledge of basic financial principles, such as budgeting, cash flow management, and financial forecasting

Innovative nature of college has made itself as a mark for quality and disciplined education. We have two PG programs in Pharmaceutics & Quality Assurance Techniques. Areas of research include novel drug delivery systems and analytical method developments. validation.

ABOUT THE SEMINAR

Entrepreneurship refers to the process of starting and managing a new business, typically with the aim of making a profit. Entrepreneurs are individuals who identify opportunities, develop innovative ideas, and take on the associated risks to create and operate new ventures. Entrepreneurship plays a vital role in driving economic growth, innovation, and job creation in societies. Key aspects of entrepreneurship include: Innovation: introduce novel products, services, or business models to address unmet needs or solve problems in the market. Risk-taking: Starting a new business involves uncertainties and risks, such as financial investment, market volatility, and competition. Creativity: Developing unique and innovative ideas is a core aspect of entrepreneurship. Resource Management: Entrepreneurs need to manage various resources, including capital, human resources, time, and technology, to bring their ideas to fruition. Market Research: Understanding the target market's needs, preferences, and trends is crucial for entrepreneurs to create products or services that will resonate with customers. Business Planning: Entrepreneurs develop business plans that outline their vision, goals, strategies, and operational details. A well-structured business plan helps attract investors and guides the business's growth. Networking: Building a strong network of contacts, including mentors, investors, suppliers, and customers, can provide valuable support and opportunities for entrepreneurs. Persistence: Entrepreneurship often involves facing challenges and setbacks. Persistence and resilience are essential qualities for overcoming obstacles and staying committed to the business's success. Eminent resource person will address the delegates

ABOUT THE SEMINAR

Communication skills are a set of abilities that allow individuals to effectively convey and exchange information, thoughts, ideas, and feelings with others. Strong communication skills are essential in both personal and professional settings, as they enable clear understanding, collaboration, and relationship-building. Effective communication involves various aspects, including verbal, nonverbal, and written communication. Some key components of communication skills are Listening: It involves focusing on the speaker, understanding their message, and showing empathy. Verbal Communication: This refers to the use of spoken language to convey information. Clear and concise speech, proper pronunciation, and appropriate tone are important for effective verbal communication. Nonverbal Communication: Body language, facial expressions, gestures, posture, and eye contact all contribute to nonverbal communication. These cues can often convey emotions and intentions more strongly than words alone. Empathy: Understanding and considering the feelings, perspectives, and emotions of others is essential for building connections and showing respect in communication. Clarity and Conciseness: Effective communicators express their ideas clearly and succinctly, avoiding unnecessary jargon or overly complex language that might confuse the audience.

ABOUT THE WORKSHOP

Intellectual property rights are like any other property right. They allow creators, or owners, of patents, trademarks or copyrighted works to benefit from their own work or investment in a creation. Intellectual property refers to creations of the mind: inventions; literary and artistic works; and symbols, names and images used in commerce. Intellectual property is divided into two categories: Industrial Property includes patents for inventions, trademarks, industrial designs and geographical indications. Copyright covers literary works (such as novels, poems and plays), films, music, artistic works (e.g., drawings, paintings, photographs and sculptures) and architectural design. The promotion and protection of intellectual property spurs economic growth, creates new jobs and industries, and enhances the quality and enjoyment of life. The workshop aimed at enhancing knowledge and understanding of the purpose, substance and scope of Intellectual Property Rights and to create awareness of IPR so as to equip the students and other professional with the latest developments in the field of IPR. It tends to incline and encourage the audience towards Intellectual Property law and provide awareness of Intellectual property rights.

Sincere efforts of the faculty members have created history in the academics of University of Pune by showing excellence in the University exams. Innovative nature of college has made itself as a mark for quality and disciplined education. We have two PG programs in Pharmaceutics & Quality Assurance Techniques. Areas of research include novel drug delivery systems and analytical method developments. validation.

ABOUT THE WORKSHOP

Blueprint for Success is a broad roadmap to help youth discover their purpose, develop their identity, and give their lives significance. Blueprint for Success is a free student-success series designed to help you develop effective strategies to maximize your academic potential. Your career blueprint is a visual map that can help take you from today to the future. It's always a work in progress, constantly evolving, and will likely need to be tweaked from time to time. six steps will guide you as you create your blueprint to a career full of success: 1) Start with your current situation. 2) Define your goals. 3) Make a list of your challenges 4) Add detail to your long-term goals 5) List the milestones you'll need to accomplish 6) Create a check-up plan to hold you accountable. A seminar is organized for the students to understand the perspectives of career growth.

ABOUT THE WORKSHOP

Study Abroad will change life. In addition to the many ways it will benefit personally and academically, studying abroad will open new doors for career and helps to build a unique skill set that employers love. The places someone explore, the people meet, and the experiences will prepare individual to succeed in any workplace.

In an increasingly interconnected and global marketplace, studying abroad quickly and effectively build proficiencies that will help to excel. It engages with host community in a way that builds true cultural awareness. That firsthand knowledge of living and learning within international cultures is key to nurturing the personal qualities valued in every workplace. It is a unique opportunity to expand that network much further than campus or your city, host family, students and faculty living in host country, or other students studying abroad, could be valuable resources in helping find ideal domestic or international job. Depending on the country someone exposed to a new language. Many universities require international students to have a certain level of English language proficiency as the courses are delivered in English.

ABOUT THE WORKSHOP

overview of some recent trends in the pharmaceutical industry.

Biopharmaceuticals and Biologics: Biopharmaceuticals, including biologics like monoclonal antibodies, have gained significant attention due to their potential for treating complex diseases such as cancer, autoimmune disorders, and rare genetic conditions.

Artificial Intelligence and Machine Learning: Pharmaceutical companies are increasingly utilizing AI and machine learning for drug discovery, molecular modeling, clinical trial design, and predictive analytics. These technologies can accelerate drug development and improve success rates.

Digital Health Solutions: The integration of digital technologies like wearables, mobile apps, and telemedicine is transforming healthcare delivery and patient monitoring. These tools can aid in data collection for clinical trials, patient engagement, and disease management.

Regulatory Changes: Regulatory agencies are exploring ways to expedite drug development processes while maintaining safety and efficacy standards. Initiatives like the FDA's Breakthrough Therapy designation aim to accelerate the approval of innovative therapies.

ABOUT THE WORKSHOP

A pharmacist is a healthcare professional who specializes in the preparation, dispensing, and management of medications and who provides pharmaceutical advice and guidance. Pharmacists often serve as primary care providers in the community. Pharmacists can also provide consultancy services in insurance companies. To provide excellent support services to consumers of health care insurance policies, insurance companies often employ pharmacists as customer service representatives. Pharmacists in this position typically respond to client questions and help them choose health care schemes that meet their financial preferences. They instruct customers on health care facilities that accept the firm's insurance cards. Ensures the accurate processing of insurance claims to resolve customer issues and prevent payment rejections. The Eminent speakers will focus on various aspects of career opportunities of pharmacist in health insurance sector.

Sincere efforts of the faculty members have created history in the academics of University of Pune by showing excellence in the University exams. Innovative nature of college has made itself as a mark for quality and disciplined education. We have two PG programs in Pharmaceutics & Quality Assurance Techniques. Areas of research include novel drug delivery systems and analytical method developments. validation.

ABOUT THE WORKSHOP

A patent is an exclusive right granted by a country to an inventor, allowing the inventor to exclude others from making, using or selling his or her invention in that country during the life of the patent. It does NOT give the inventor the right to use or "practice" the invention, and thus the right is subject to any prior rights that others may have to related inventions. A patent is issued to the individual inventor and not to a company, although it is typical practice to have employees assign inventions to their employer. Patent protection is available for any product, process or design that meets certain requirements of novelty, nonobviousness and utility. patent is a valuable business asset and an important commercial tool, and can be used in many different ways. You may choose to file a patent application for a variety of reasons, including: Gaining exclusive rights — a patent provides you with a monopoly to the invention for up to 20 years. A defensive move — filing a patent for an invention that may not be commercialised to prevent a competitor from protecting the same concept. To increase market position — through exclusive rights, you're able to prevent others from commercially using your patented invention, establishing yourself in the market as the pre-eminent player..

ABOUT THE SEMINAR

The pharmaceutical industry is defined as the discovery, development, and manufacture of drugs and medications. It's widespread, including research, chemicals, and the regulation and involvement of government agencies. However, the characteristics of the pharmaceutical industry differ by region. The pharmaceutical industry can be viewed as a complex system of processes, operations, and organizations involved in the discovery, development, and manufacturing of drugs. A seminar is organized for benefit of students on Pharmaceutical Industry-An inside view'.

Report

Pharmaceutical Industry- An inside view

Seminar was organized on the topic 'Pharmaceutical Industry-An inside view' on 23rd December 2019. Speaker was Mr. Shridhar Joshi, Proprietor at J. B. Chemicals.. He explained that the pharmaceutical industry has a number of unusual characteristics that make it very different from what people normally think of as industry. He explained the commercial realities and constraints of the business, together with its current problems including the development of a greener pharmacy. He explained infrastructural set-up of J. B. Chemicals for smooth and systematic execution of all business operations. Felicitation of Mr. Shridhar Joshi was done by Principal Dr. K. R. Khandelwal. Vote of thanks given by Prof. Anil Tankar.

ABOUT JAYAWANT SHIKSHAN PRASARAK MANDAL

Jayawant Shikshan Prasarak Mandal was established in the year 1998 with an objective of creating centre of excellence for education in the field of engineering, Pharmacy, Information technology and Management. JSPM caters various institutes providing full fledged education from KG to PG, diploma, graduation and post-graduation course in various disciplines spreaded at Tathawade, Hadapsar, Wagholi, Narhe & Bavdhan campuses.

The trust was established by Hon. Dr. Prof. T. J. Sawant, who is an academican, agriculturist and an entrepreneur. The trust's mission is "To provide, nurture & maintain an achievement of high academic excellence, research & entrepreneurship for all aspiring students, which will prepare them to face global challenges".

ABOUT RAJARSHI SHAHU COLLEGE OF PHARMACY & RESEARCH

Rajarshi Shahu College of Pharmacy & Research was established in the academic year 2006-07. The college is situated in lush green campus of JSPM at Tathawade, Pune. The institute is recognized by Govt. of Maharashtra & Affiliated to Savitribai Phule Pune University, Pune; NAAC accredited with "A" grade in 2017; The college started its progressive path under the University approved Principal Dr. K. R. Khandelwal, who is in Pharmacy profession since 1983. The college has got all necessary approvals from AICTE New Delhi, PCI, and affiliated to University of Pune. Investment in human potential has helped college to create skilled and devoted team. The college has well experienced and dedicated staff members. Sincere efforts of the faculty members have created history in the academics of University of Pune by showing excellence in the University exams. Innovative nature of college has made itself as a mark for quality and disciplined education. We have two PG programs in Pharmaceutics & Quality Assurance Techniques. Areas of research include novel drug delivery systems and analytical method developments. validation.

ABOUT THE SEMINAR

Medical research involves research in a wide range of fields, such as biology, chemistry, pharmacology and toxicology with the goal of developing new medicines or medical procedures or improving the application of those already available. It can be viewed as encompassing preclinical research (for example, in cellular systems and animal models) and clinical research (for example, clinical trials). Innovation is a process by which a domain, a product, or a service is renewed and brought up to date by applying new processes, introducing new techniques, or establishing successful ideas to create new value. The creation of value is a defining characteristic of innovation. Innovations in Medical Research is the need of today's era. A Workshop is organized by understanding and considering the perspectives of essential of enrichment of the Innovations in Medical Research.

ABOUT THE SEMINAR

Personality development grooms an individual and helps him make a mark of his own. Individuals need to have a style of their own for others to follow them. Personality development helps to develop a positive attitude in life. An individual with a negative attitude finds a problem in every situation. Rather than cribbing and criticizing people around, analyze the whole situation and try to find an appropriate solution for the same. It is essential for individuals to behave well with people around. Being polite with others will not only make you popular among other people but also earn you respect and pride. You can't demand respect by being rude with people around. Personality development plays an important role in developing not only your outer but also inner self. Human being is a social animal. One needs people around. An individual needs to have that magnetic power which attracts people towards him. Personality development helps an individual to inculcate positive qualities like punctuality, flexible attitude, willingness to learn, friendly nature, eagerness to help others and so on. Never hesitate to share information with others. Certain key point of personality development are Smile a lot, Think positive, Dress Sensibly, Be soft-spoken, Leave your ego behind, Avoid Backbiting, Confidence, A Patient listener.

(Accredited with 'A' grade by NAAC)

About Jayawant Shikshan Prasarak Mandal

Jaywant Shikshan Prasarak Mandal (JSPM) was established by Prof. (Dr.) T. L. Sarnaik, who is an academician, agricultural and an entrepreneur in the year 1986 with an objective of creating centre of excellence for education in the field of engineering, Pharmacy, Information Technology and Management.

The mission of JSPM is "To provide, nurture & maintain an environment of high academic excellence, research & entrepreneurship for all aspiring students, which will prepare them to face global challenges". JSPM caters various institutes providing UG, fledged education from KG to PG courses in various disciplines served at Tathawade, Hadapsar, Wagholi, Narhe & Aarekhur campus.

About Rajarshi Shahu College of Pharmacy & Research

Rajarshi Shahu College of Pharmacy & Research was established in the academic year 2005-07. The college is situated in lush green campus of JSPM at Tathawade, Pune.

The college started its progressive path under the leadership of Principal, Dr. K. R. Khandalkar, who is having an immense experience in Pharmacy education. The college is approved by statutory bodies such as AICTE, PCI and affiliated to Savitribai Phule Pune University (SPPU). Investment in human potential has helped college to create skilled and dedicated staff members. Sincere efforts of the faculty members have created history in the SPPU by showing excellence in the University exams. Innovative nature of college has made itself as a mark for quality and disciplined education. The College is successfully running two PG programs (Pharmaceutics & Pharmaceutical Quality Assurance) along with UG (B. Pharm). Trust areas of research include NDDS, analytical method developments and Natural product chemistry. Recently the College has been accredited with 'A' grade by MAAC.

About The Seminar

The practice of Pharmacy has changed significantly in recent years. The pharmacist's role has shifted from traditional compounder and dispensing chemist to one of "Drug therapy manager". Pharmacist's role has expanded from Pre-Pharm clinical to clinical aspects, which includes manufacturing, quality control, drug discovery, regulatory pharmaceuticals, drug dispensing, patient education, patient consulting, hospital/pharmacy administration and community services. Pharmacist's responsibility has shifted substantially toward the utilization of pharmaceutical knowledge in the rational use of medications by the patient. The concept of the "Seven-Star pharmacist" was introduced by the WHO in March 2014 and highlighted pharmacist's role as caregiver, decision maker, communicator, manager, life-long learner, teacher and leader.

The objective of the present seminar is to provide a platform for sharing ideas and knowledge regarding the newer roles of pharmacist in the allied sectors like Information Technology, Intellectual property rights, Business development, marketing strategies and Entrepreneurship development etc.

The Seminar features deliberations by the experts from various disciplines of pharmacy which will provide the opportunity to the Students and research scholars for assimilating knowledge in recent trends in pharmacy field.

ABOUT THE SEMINAR

Soft skills are personal attributes that influence how well you can work or interact with others. These skills make it easier to form relationships with people, create trust and dependability, and lead teams. Most interactions with other people require some level of soft skills. At a company you might be negotiating to win a new contract, presenting your new idea to colleagues, networking for a new job, and so on. We use soft skills everyday at work and developing these soft skills will help you win more business and accelerate your career progression. On the other hand, a lack of soft skills can limit your potential, or even be the downfall of your business. By developing strong leadership, delegation, teamwork, and communication abilities, you can run projects more smoothly, deliver results that please everyone, and even positively influence your personal life by improving how you interact with others. Outside of the office, soft skills such as communication are used to build friendship groups and meet potential partners. You might be negotiating the price of your new house renovation, or mentoring your neighbours children on the weekend. Soft skills are useful both in our professional and personal lives.

Sincere efforts of the faculty members have created history in the academics of University of Pune by showing excellence in the University exams. Innovative nature of college has made itself as a mark for quality and disciplined education. We have two PG programs in Pharma-

ABOUT THE WORKSHOP

Intellectual property is a broad categorical description for the set of intangible assets owned and legally protected by a company or individual from outside use or implementation without consent. An intangible asset is a non-physical asset that a company or person owns. The concept of intellectual property relates to the fact that certain products of human intellect should be afforded the same protective rights that apply to physical property, which are called tangible assets. Most developed economies have legal measures in place to protect both forms of property. Companies are diligent when it comes to identifying and protecting intellectual property because it holds such high value in today's increasingly knowledge-based economy. Also, producing value intellectual property requires heavy investments in brainpower and time of skilled labor. This translates into heavy investments by organizations and individuals that should not be accessed with no rights by others. Eminent resource person from IPR field will address the delegates

ABOUT THE SEMINAR

Pharmacovigilance is the science and activities relating to the detection, assessment, understanding and prevention of adverse effects or any other medicine/ vaccine related problem. All medicines and vaccines undergo rigorous testing for safety and efficacy through clinical trials before they are authorized for use. The role of Pharmacovigilance is to identify any changes to the benefit-risk balance of your medicine • take appropriate action in a timely manner when necessary • update product labels and product information (PI) with new safety information in a timely way. Pharmacovigilance distinguishes between adverse events and adverse reactions. a seminar is organized by understanding and considering the perspectives of essential of enrichment of the Pharmacovigilance knowledge for the students.
