

2.2.1 - The institution assesses the learning levels of the students and organizes special Programmes for advanced learners and slow learners

The Institution identifies advanced learners and slow learners at two levels

I. Assessment of learning level of students at entry level (newly admitted to first year B Pharm students) was performed by following methodology-

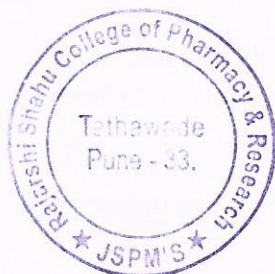

1. Review of MHT-CET score of students
2. Eligibility score (12th PCM/PCB % age)
3. Aptitude Test evaluation

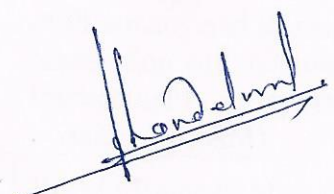

Class Teachers and Mentors evaluate above data and categorize students as advanced and slow learners and provide them suitable guidance.

II. Assessment of learning level at subsequent levels (second, third and final year B Pharm students) was performed by review of their Continuous Internal Examination (CIE) i.e. sessional exam marks. Subject teacher reviews sessional examination marks of students and categorize them as slow and advanced learners.

Special programs are organized and implemented by the institution for slow learners such as Counselling of these students by Mentors, Scheduling of Remedial classes, availability of study materials (Subject chapter PowerPoint presentations, E books, Video Clips of subject topics) through learning management system and Google Classroom and organization of Guest Lectures, Skill Development Programs. Student Progression Monitoring in CIE helps to enhance the learning ability of slow learners. Along with this, organization of Yoga and Meditation Sessions helps students to strengthen the concentration and improvise the memorization ability.

Special programs are arranged and executed by the institution for boosting creativity, leadership and intelligence of advanced learners such as participation in Group activities, Conferences/Seminars, Journal club, Peer teaching. Paper and Poster preparations in seminars/conferences, organization of Skill Development Programs, Career guidance sessions, Visit to Hospitals and Pharmaceutical Industry.
